

## Operation on Array:

```
<html>

<script>

  // Create an array
  let array = [1, 2, 3, 4, 5];

  // Function to remove a specific element from the array
  function removeElement(arr, element) {
    return arr.filter(item => item !== element);
  }

  // Function to check if an array contains a specified value
  function containsElement(arr, element) {
    return arr.includes(element);
  }

  // Function to empty an array
  function emptyArray(arr) {
    arr.length = 0;
    return arr;
  }

  // Example usage
  document.write("Original array:", array);

  // Remove element 3
  array = removeElement(array, 3);
  document.write("After removing 3:", array);

  // Check if array contains 2
  document.write("Contains 2:", containsElement(array, 2));

  // Empty the array
  array = emptyArray(array);
  document.write("After emptying:", array);

</script>

</html>
```
